

**METHOD FOR REMOTE VEHICLE IGNITION ENABLEMENT AND DISABLEMENT
VIA BROADBAND ENABLED SECURITY MECHANISMS**

ABSTRACT

5 A method, apparatus, and computer program are provided
for remotely controlling the ignition of a vehicle. A variety
of condition can be placed on vehicle for operation, such as
time or geography, from a variety of remote wireless
technologies. The ignition control system is also capable of
10 effectively learning safe zones under which the vehicle can
operate. Also, the ignition control system can cease
operations upon request by an owner or law enforcement.
